Subject Index

Abscesses, subcutaneous, due to *B fragilis* and other aerobic bacteria, antibiotic and clavulanic acid treatment, 156
Acid-phosphatase activity in alveolar and peritoneal macrophages, effect of virulence of strains of *N asteroides*, 117
Acquired immune deficiency syndrome
and variants (Readers' Register), 358
central nervous system complications in homosexual men, 771
diminished capacity to make interferon-α and opportunistic infections in homosexuals, 962
in the United States, 339
Acyclovir, high-dose, in treatment of cytomegaloviral pneumonia, 557
Acyclovir-resistant herpes simplex virus isolated from marrow transplant patients receiving multiple courses of treatment, 1077
Acyclovir-treated patients, in vitro sensitivity to acyclovir in genital herpes simplex viruses, 868
Adenovirus types 19 and 37, antigenic and restriction enzyme analyses in isolates from epidemic keratoconjunctivitis, 24
Adherence of *B pertussis* to human respiratory epithelial cells, 125
Aeromonas species, association with childhood gastroenteritis, 68
Alveolar macrophages, human, effect on the bactericidal capacity of neutrophils, 101
Aminoglycoside resistance, enzyme-mediated, comparison in gram-negative bacilli isolated in Turkey and the United States, 1128
Amodiaquine and chloroquine, in vitro differences in sensitivity of *P falciparum* in Kenya, 732
Anaerobic bacteria, curved, in bacterial (nonspecific) vaginosis, response to therapy, 817
Anemia, hemolytic, and Q fever, 769
Anion, human neutrophil superoxide, defect in generation elicited by *N*-formylmethionylleucylphenylalanine in pregnancy, 194
Antibiotic
failures in perforated and gangrenous appendicitis, 322
regimens, prophylactic, in patients with acute leukemia, 1171
synergism in experimental *P aeruginosa* infections, 1172
trapping, associated with β-lactamase, a potential means of resistance, 316
treatment of subcutaneous abscesses caused by *B fragilis* and other aerobic bacteria, 156
Antibiotics, β-lactam, coagulation abnormalities in cancer patients, 745
Antibody
complexes, respiratory syncytial virus, activation of oxidative and arachidonic-acid metabolism in neutrophils, 110
IgG, to type-specific polysaccharide of group B *Streptococcus* type Ia, protective level, 648
IgG and IgM, to *C jejuni*, diffusion-in-gel enzyme-linked immunosorbent assay for detection, 82
IgM
responses to hepatitis B surface antigen in recipients of hepatitis B virus vaccine, 330
to *C burnetii*, detection by enzyme-linked immunosorbent assay compared with other methods, 477
to hepatitis B core antigen in chronic infections with hepatitis B virus, 445
response
serum neutralizing, to hepatitis A virus, 1033
to *H influenzae* type b capsular polysaccharide vaccine, 767
to pneumococcal vaccination in children younger than five years of age, 131
to toxins A and B of *C difficile*, 93
virus excretion, and viremia in volunteers with low levels of antibody to rubella virus, 639
to *C albicans*, serial enzyme-linked immunosorbent assay during chemotherapy for acute leukemia, 275
to *C trachomatis*, microimmunofluorescence test in adults with respiratory disorders, 1167
to hepatitis A virus, prevalence in a Saudi Arabian hospital population, 1167
to individual polypeptide antigens of herpes simplex virus type 1 in human sera, 436
to *M. pneumoniae* in bacterial meningitis, 363
to rabies virus, persistence in free-ranging raccoons, 610
to staphylococcal enterotoxin F, prevalence in Wisconsin and implications for toxic-shock syndrome, 692
Antibody-dependent cell-mediated cytotoxicity against influenza virus–infected cells, 785
Antigen
bacterial sonicate, enzyme-linked immunosorbent assay for antibodies to *F tularensis*, 715
glycoprotein, of viral varicella-zoster, expression in vitro and in chickenpox and zoster vesicles, 630
hepatitis B
core, low-molecular-weight IgM antibody in chronic infections with hepatitis B virus, 445
surface, and IgM antibody responses to hepatitis B virus vaccine, 330
human leukocyte
control of susceptibility to pulmonary tuberculosis and association with HLA-DR types, 676
in women with recurrent urinary tract infections, 604
nonlipopolysaccharide, of *V cholerae*, prophylactic significance, 931
polypeptide, of herpes simplex virus type 1, antibodies in human sera, 436
Antimicrobial resistance of gram-negative bacteria isolated from foods in Mexico, 766
Antimicrobial therapy
for curved anaerobic bacteria in bacterial (nonspecific) vaginosis, 817
of chancroid, effectiveness of erythromycin, 726
Appendicitis, perforated and gangrenous, analysis of antibiotic failures, 322
Arachidonic-acid metabolism of neutrophils, activation by respiratory syncytial virus antibody complexes, 110
Ascitic fluid from cirrhotic and noncirrhotic patients, bactericidal and opsonic activity, 774
Aspergillosis
experimental murine, treatment with BAY n7133, 898
invasive, coticosteroid therapy in renal transplantation, 230
Attachment
of *N meningitidis* and entry into columnar epithelial cells, 369

of plasma membrane vesicles of human macrophages to *L tropica* promastigotes, 377
Avidin-biotin radioimmunoassay for human rotavirus, 942
Aztreonam, a new monobactam antibiotic, effectiveness against penicillin-resistant gonococci, 612
Babesia microti
and *I dammini*, association with spirochetes in Rhode Island, 1124
infection, morphologic and clinical observations, 239
Babesiosis, morphological and clinical observations, 239
Bacteremia due to *P aeruginosa*, use of a combined typing system in an eight-year study, 603
Bacteria, perturbation of normal mechanism of intraleukocytic killing, 189
Bacterial agglutination test, comparison to enzyme-linked immunosorbent assay for antibodies to *F tularensis*, 715
Bacterial and opsonic activity of ascitic fluid from cirrhotic and noncirrhotic patients, 774
Bacterial meningitis in children, treatment with moxalactam, 886
Bactericidal capacity of neutrophils, effect of human alveolar macrophages, 101
Bacteriuria due to *U urealyticum* and *G vaginalis* in women with preeclampsia, 605
Bacteroides fragilis
mechanism of action of metronidazole, 1083
quantitative variability in opsonization requirements, 667
subcutaneous abscesses, antibiotic and clavulanic acid treatment, 156
Bangladesh, epidemiologic and clinical features of *C jejuni* infection, 292
BAY n7133 as treatment of experimental murine aspergillosis, 898
Biotypes in *H influenzae* type b from patients with meningitis, 75, DEC
Bleeding associated with β-lactam antibiotics (Readers' Register), 952
Bordetella pertussis
adherence to human respiratory epithelial cells, 125
transplacental and transcolostral immunity, in a mouse model using acellular pertussis vaccine, 138
Borna disease, pathogenesis in rats, immune-mediated viral ophthalmoencephalopathy, blindness, and behavioral abnormalities, 305
Brain abscess, treatment with penicillin and chloramphenicol, 737
Brazil, patterns of disease, nutritional impact, etiologies, and risk factors of diarrhea, 986
Broad-spectrum cephalosporins, effect on the microbial flora of recipients, 892
Bronchiectasis and cystic fibrosis, comparison of gentamicin activity in serum and purulent sputum, 1069
Campylobacter jejuni
diffusion-in-gel enzyme-linked immunosorbent assay for detection of IgG and IgM antibodies, 82
endemic infection in Bangladesh, epidemiologic and clinical features, 292
enteritis, diversity of serotypes in outbreaks, 617
raw chicken as a source of infection, 770
Cancer, coagulation abnormalities induced by β-lactam antibiotics, 745
Candida albicans
antigen, serial enzyme-linked immunosorbent assay during induction chemotherapy for acute leukemia, 275
complete resolution of acute pulmonary mycetoma, 1131
Capsular polysaccharide
of *H influenzae*, comparative virulence in normal and complement-depleted rats, 385
second generation pneumococcal vaccine, 1136
Capsule of *E coli* K1, role in the pathogenesis of neonatal infection, 395
Carboxylase, vitamin K–dependent, inhibition by cefamandole and its structural analogs in vitro, 571
Cefamandole and its structural analogs, inhibition of vitamin K–dependent carboxylase in vitro, 571
Cefazolin, in vitro activity against *S aureus* and *S epidermidis* and effect of human serum, 178
Cefonicid, in vitro activity against *S aureus* and *S epidermidis* and effect of human serum, 178
Cell
envelope protein subtypes in *H influenzae* type b from patients with meningitis, 75, DEC
proteins of *H ducreyi*, characterization by polyacrylamide gel electrophoresis, 710
Cell-mediated immunity
specific, natural history of congenital cytomegalovirus infection, 953
suppressor cells, and cyclophosphamide, immunomodulatory interactions in experimental nephritis, 1096
Central nervous system
complications in homosexual men with acquired immune deficiency syndrome, 771
immunoglobulin levels in serum and cerebrospinal fluid in certain viral infections, 607
Cephalosporins, broad-spectrum, effect on the microbial flora of recipients, 892
Cephalothin, liposome-encapsulated, intraphagocytic killing of *S typhimurium*, 563
Cerebrospinal fluid
from patients with meningitis and encephalitis, levels of creatine kinase isoenzyme BB, 180
human, immunoglobulin levels in certain viral infections of the central nervous system, 607
Chancroid, effectiveness of antimicrobial therapy with erythromycin, 726
Cheese made from raw milk, 1169
Chemoprophylaxis, selective intrapartum, of neonatal group B streptococcal early-onset disease
interruption of mother-to-infant transmission, 810
predictive value of prenatal cultures, 802
epidemiologic rationale, 795
Chemotactic and migratory activity of neutrophils, impairment during murine cytomegalovirus infection, 518
Chemotherapy, induction, for acute leukemia, serial enzyme-linked immunosorbent assay for antibody to *C albicans*, 275
Chick embryo cell–derived vaccine for Rocky Mountain spotted fever, reactogenicity, immunogenicity, and efficacy, 922
Chicken, raw, as a source of *C jejuni* infection, 770
Chickenpox, expression of varicella-zoster viral glycoprotein antigens, 630
Chlamydia trachomatis
and cytomegalovirus coinfection, seroepidemiologic data, 332
and salpigitis in mice, 1101
microimmunofluorescence test for antibodies in adults with respiratory disorders, 1167

Chloramphenicol and penicillin in treatment of brain abscess, 737
Chloroquine and amodiaquine, in vitro differences in sensitivity of *P falciparum* in Kenya, 732
Cimetidine and interstitial nephritis, association with recurrent fever of unknown origin, 1132
Circulating immune complexes, clinical correlates in yersiniosis, 223
Clavulanic acid treatment of subcutaneous abscesses caused by *B fragilis* and other aerobic bacteria, 156
Clioquinol, an 8-hydroxyquinoline derivative, effect on rotavirus infection in mice, 613
Clonal concept in the epidemiology, taxonomy, and evolution of Enterobacteriaceae and other bacteria, report of a workshop, 346
Clonal nature of enteropathogenic *E coli* strains, 1019
Cloned probes to detect Epstein-Barr viral DNA in patients with neoplastic and lymphoproliferative diseases, 967
Clostridium bifermentans and *C sordellii*, role in false-positive counterimmunoelectrophoresis tests for *C difficile*, 1168
Clostridium difficile
  failure to detect in foods, 360
  false-positive counterimmunoelectrophoresis tests, role of *C bifermentans* and *C sordellii*, 1168
  isolation rate and toxigenic potential of isolates from patients with cystic fibrosis, 176
  serum antibody response to toxins A and B, 93
  toxin A in infants, 606
Clostridium sordellii and *C bifermentans*, role in false-positive counterimmunoelectrophoresis tests for *C difficile*, 1168
Coagulation abnormalities induced by β-lactam antibiotics in cancer patients, 745
Coinfection, cytomegalovirus and *C trachomatics*, seroepidemiologic data, 332
Colonization, cervical and placental, by *U urealyticum* in pregnant women, fetal outcome, 333
Complement components, deficits in patients with recurrent meningococcal infections, 331
Complement fixation test, comparison with enzyme-linked immunosorbent assay in detection of IgM antibody to *C burnetii*, 477
Complement, second component, meningococcemia in genetically determined deficiency, 941
Congenital defects in mice, effect of murine cytomegalovirus, 836
Corticosteroid therapy for invasive aspergillosis in renal transplantation, 230
Cost benefit of vaccination for hepatitis B in hemodialysis centers, 770
Counterimmunoelectrophoresis tests, false-positive, for *C difficile*, role of *C bifermentans* and *C sordellii*, 1168
Coxiella burnetii
  associated with endocarditis in Nova Scotia, 978
  detection of IgM antibody by enzyme-linked immunosorbent assay compared with other methods, 477
Creatine kinase isoenzyme BB in cerebrospinal fluid from patients with meningitis and encephalitis, 180
Cryptosporidium, human,
  accidental infection of a researcher, 772
  and calf, development in chick embryos, 1108
Cyclophosphamide
  effect on acute vs chronic renal infection in rats, 337
  suppressor cells, and cell-mediated immunity, immunomodulatory interactions in experimental nephritis, 1096
Cystic fibrosis
  and bronchiectasis, comparison of gentamicin activity in serum and purulent sputum, 1069
  isolation rate and toxigenic potential of *C difficile* isolates, 176
Cytomegalovirus
  and *C trachomatis* coinfection, seroepidemiologic data, 332
  and development of pneumonia in renal transplant recipients, risk factors, 1121
  cell-mediated immunity during pregnancy in lower socioeconomic class adolescents, 621
  excretion in human milk, 615
  infection, murine, impaired migratory and chemotactic activity of neutrophils, 518
  murine
    effect of infection on congenital defects and fetal maldevelopment, 836
    lethal infection after early viral replication in the spleen, 406
  natural history of congenital infection and specific cell-mediated immunity, 953
  pneumonia, treatment with high-dose acyclovir and human leukocyte interferon, 557
  radioimmunoassay for specific IgM antibodies, specificity and sensitivity, 616
Cytotoxic action of Shiga toxin, evidence for a translocation step in the pathogenesis of shigella diarrhea, 844
Cytotoxicity
  antibody-dependent cell-mediated cytotoxicity against influenza virus–infected cells, 785
  of human peritoneal macrophages mediated by cytophilic IgG, 1040
  of leukocytes for herpes simplex virus–infected cells, effect of Intralipid, 181
Dane particle suppression, acute, with recombinant leukocyte A interferon in chronic hepatitis B virus infection, 907
Delta agent, frequency of infection in Kuwait, 768
Dengue 2 vaccine, dose response in volunteers in relation to Yellow Fever immune status, 1055
Dialysis, continuous ambulatory peritoneal, peritonitis due to *L monocytogenes*, 1130
Diarrhea
  due to *Shigella*, evidence for a translocation step in the cytotoxic action of Shiga toxin, 844
  patterns of disease, nutritional impact, etiologies, and risk factors in northeastern Brazil, 986
Diffusion-in-gel enzyme-linked immunosorbent assay for detection of IgG and IgM antibodies to *C jejuni*, 82
Diphtheria-pertussis-tetanus vaccine, immunogenicity in combination with an *H influenzae* type b vaccine, 530
Disease mechanisms and prospects for prevention of Reye's syndrome, summary of a workshop, 943
DNA
  hybridization technique for the detection of *N gonorrhoeae* in men with urethritis, 462
  sequence variability of closely related nosocomial gentamicin-resistant plasmids, 1013
  Epstein-Barr viral, detection in patients with neoplastic and lymphoproliferative diseases by use of cloned probes, 967
  recombinant, and poorly mobilizable plasmids in biologic

containment, risk assessment in humans, 699
Editorial
a new pertussis vaccine, 146
human rotaviruses and genome RNA, 49
Electropherotypes of human rotavirus isolated in Chile, characteristics and analysis, 41
Electrophoresis of RNA from human rotavirus to establish the identity of strains in a tertiary care nursery, 34
Electrophoretic heterogeneity and interstrain variation of the lipopolysaccharide of *H influenzae*, 492
Encephalitis, levels of creatine kinase isoenzyme BB in cerebrospinal fluid, 180
Endocarditis
associated with Q fever in Nova Scotia, 978
enterococcal, results of therapy (Readers' Register), 162
human, due to *S bovis*, humoral reactions, 266
infectious, due to *Y enterocolitica*, 940
Entamoeba histolytica, susceptibility testing, 1090
Enterobacter cloacae
infections in a burn unit, retrospective analysis of plasmid patterns, 18
nonspecific induction of β-lactamase, 765
Enteric agents in the community, the Tecumseh study, 284
Enteritis due to *C jejuni*, diversity of serotypes in outbreaks, 617
Enterobacteriaceae, clonal concept in epidemiology, taxonomy, and evolution, report of a workshop, 346
Enterococcal endocarditis, results of therapy (Readers' Register), 162
Enterotoxin, *E coli* heat-stable, protection of suckling mice by human milk, 1114
Enterotoxin F of *S aureus*
human neutrophil oxidative metabolism, 763
prevalence of antibody in Wisconsin and implications for toxic-shock syndrome, 692
Enzyme-linked immunosorbent assay
diffusion-in-gel, for detection of IgG and IgM antibodies to *C jejuni*, 82
for susceptibility to varicella, 472
IgM and IgG, for Rocky Mountain spotted fever, 876
in detection of IgM antibody to *C burnetii*, comparison with other methods, 477
serial, for antibody to *C albicans* during induction therapy for acute leukemia, 275
tuberculosis, sensitivity and specificity, 1170
with bacterial sonicate antigen for antibodies to *F tularensis*, 715
Epidemic keratoconjunctivitis, antigenic and restriction enzyme analyses of adenovirus types 19 and 37, 24
Epidemiology
evaluation of isolated cases of salmonellosis by plasmid profile analysis, 12
implications of *V cholerae* O1 biotype E1 Tor phage types in patients from Bangladesh, 998
molecular analysis of plasmids as investigational tool, 1
of malaria in an area with a high incidence, longitudinal study of a population, 609
of rotaviruses in a cohort of 45 Guatamalan Mayan Indian children observed from birth to the age of three years, 452
outbreak of type C influenza in a children's home, 51
plasmid patterns compared to lysotype as an investigational tool for *S typhimurium* epidemics, 7
retrospective analysis of plasmid patterns in a study of burn unit outbreaks of *E cloacae* infection, 18
selective intrapartum chemoprophylaxis of neonatal group B streptococcal early-onset disease, 795
viral respiratory disease at Lowry Air Force Base in Denver, 1952–1982, 775
Epstein-Barr viral DNA, use of cloned probes in detection in patients with neoplastic and lymphoproliferative diseases, 967
Erythromycin
effect on microbial antagonisms in gnotobiotic mice inoculated with human fecal flora, 579
effectiveness in therapy for chancroid, 726
Escherichia coli
and *S aureus* cell wall fractions, activation of human purified plasma prekallikrein, 682
heat-stable enterotoxin, protection of suckling mice by human milk, 1114
human purified plasma prekallikrein, 682
K1, role of pili and capsule in the pathogenesis of neonatal infection, 395
in vitro attachment to human uroepithelial cells, variations in receptivity, 412
strains, enteropathogenic, clonal nature, 1019
Fecal flora, human, effect of erythromycin on microbial antagonisms in gnotobiotic mice, 579
Fetal maldevelopment, effect of murine cytomegalovirus, 836
Fever, recurrent, of unknown origin, association with cimetidine-induced interstitial nephritis, 1132
Food, failure to detect *C difficile*, 360
N-Formylmethionylleucylphenylalanine, defect in generation of human neutrophil superoxide anion in pregnancy, 194
Franciscella tularensis
detection of IgM, IgA, and IgG antibodies by enzyme-linked immunosorbent assay, 715
tick-borne, associated with clinically mild tularemia, 63
Gardnerella vaginalis bacteriuria in women with preeclampsia, 605
Gastroenteritis, childhood, association with *Aeromonas* species and other infective agents, 68
Genes for *V cholerae* toxin and *V fluvalis*, absence of nucleotide sequence, 1166
Genetic analysis of essential plasmid determinants of pathogencity in *Y pestis*, 297
Genetic factors and host resistance in experimental pyelonephritis, 336
Genital herpes simplex viruses from acyclovir-treated patients, in vitro sensitivity to acyclovir, 868
Gentamicin
comparison of activity in serum and purulent sputum from patients with cystic fibrosis or bronchiectasis, 1069
resistance in closely related nosocomial plasmids, variability in DNA sequence, 1013
Geographic conundrum of infections, 751
Glycoprotein antigens of viral varicella-zoster, expression in vitro and in chickenpox and zoster vesicles, 630
Gonococcal protein I–specific opsonic IgG in normal human serum, 1025
Gram-negative bacteria
enzyme-mediated resistance in Turkey and the United States, 1128
in foods in Mexico, antimicrobial resistance, 766

Group B streptococcal infection, summary of a workshop, 163
Guinea pigs, induction of serum resistance to *N gonorrhoeae* in a low-molecular-weight fraction, 334
Haemophilus ducreyi cell proteins, characterization by polyacrylamide gel electrophoresis, 710
Haemophilus influenzae
biotype 4, nontypable, failure to demonstrate special virulence in neonatal sepsis, 615
electrophoretic heterogeneity and interstrain variation of the lipopolysaccharide, 492
meningitis in children, treatment with moxalactam, 886
pathogenicity, comparative virulence of capsular transformants in rats, 385
type b
capsular polysaccharide vaccine, class-specific antibody response, 767
expressing fimbriae, hemadsorption method for detection of colonies, 855
homogeneity of subtypes, serotypes, and biotypes in isolates from patients with meningitis, 75, DEC
outer membrane protein subtypes and biotypes, 1127
vaccine
immunogenicity in combination with diphtheria-pertussis-tetanus vaccine in infants, 530
summary of a workshop, 167
Hantaan virus, prototype virus of hemorrhagic fever with renal syndrome, 1005
Hemadsorption method for detection of colonies of *H influenzae* type b expressing fimbriae, 855
Hemodialysis, pharmacokinetics of human and recombinant leukocyte interferon during chronic renal failure, 335
Hemolysin, purified thermostable direct, from *V parahaemolyticus*, increased vascular permeability in rabbits, 1129
Hemolytic anemia and Q fever, 769
Hemorrhagic fever and renal syndrome, Hantaan virus as prototype virus, 1005
Hepatitis, posttransfusion non-A and non-B, physicochemical properties, 254
Hepatitis A
foodborne, recommendation for control, 1133
serologic tests and immune globulin, 360
Hepatitis A virus
prevalence of antibody in a Saudi Arabian hospital population, 1167
serum neutralizing antibody response, 1033
Hepatitis B
cost benefit of vaccination in hemodialysis centers, 770
in an urban population in Kenya, seroepidemiology, 1122
Hepatitis B core antigen, low-molecular-weight IgM antibody in chronic infections with hepatitis B virus, 445
Hepatitis B virus
chronic infection, acute Dane particle suppression with recombinant leukocyte A interferon, 907
incidence of infection in dental students during clinical dental training, 181
vaccine
IgM antibody responses to hepatitis B surface antigen, 330
immunogenicity in healthy Chinese neonates, 526
Herpes simplex virus
acyclovir-resistant, in marrow-transplant patients receiving multiple courses of treatment, 1077
effect of Intralipid on cytotoxicity of leukocytes for infected cells, 181
genital, from acyclovir-treated patients, in vitro sensitivity to acyclovir, 868
incorrect typing by direct immunofluorescence, 338
type 1, antibodies to individual polypeptide antigens in human sera, 436
Herpesvirus infections in infants and children, pharmacokinetics of treatment with vidarabine, 721
Host defense against *L micdadei*, contribution of human neutrophils and serum, 510
Human leukocyte antigens in women with recurrent urinary tract infections, 604
Human neutrophil oxidative metabolism and *S aureus* enterotoxin F, 763
Humoral reactions and common *S bovis* antigen in human endocarditis, 266
IgG antibody to type-specific polysaccharide of group B *Streptococcus* type Ia, protective level, 648
IgG
cytophilic, mediation of human peritoneal macrophage cytotoxicity, 1040
opsonic, gonococcal protein I-specific, in normal human serum, 1025
IgM, IgA, and IgG antibodies to *F tularensis*, enzyme-linked immunosorbent assay with bacterial sonicate antigen, 715
IgM antibody
to *C burnetii*, detection by enzyme-linked immunosorbent assay compared with other methods, 477
to hepatitis B core antigen in chronic infections with hepatitis B virus, 445
IgM antibody responses to hepatitis B suface antigen in recipients of hepatitis B virus vaccine, 330
Immune complexes, circulating, clinical correlates with yersiniosis, 223
Immune globulin and serologic tests for hepatitis A, 360
Immune response, human, to a polysaccharide vaccine from *P aeruginosa*, 206
Immunity
cell-mediated, cytomegalovirus-specific, during pregnancy in lower socioeconomic class adolescents, 621
to pertussis, transplacental and transcolostral, in a mouse model using acellular pertussis vaccine, 138
Immunofluorescence
comparison with enzyme-linked immunosorbent assay in detection of IgM antibody to *C burnetii*, 477
direct, incorrect typing of herpes simplex virus, 338
Immunogenicity
of an *H influenzae* type b vaccine in combination with diphtheria-pertussis-tetanus vaccine in infants, 530
of hepatitis B virus vaccine in healthy Chinese neonates, 526
Immunoglobulin levels in serum and cerebrospinal fluid in certain viral infections of the central nervous system, 607
Immunologic responses of children to serious infections with *S pneumoniae*, 427
Indirect fluorescent antibody test for Rocky Mountain spotted fever, 876
Infectious Diseases Society of America
program of the 21st Annual Meeting, 619
tentative four-year meeting schedule, 619
Influenza A virus, H3N2 subtype in Japan and Southeast

Asia, analysis by monoclonal antibodies, 1126
Influenza type C, outbreak in a children's home, 51
Influenza virus–infected cells, antibody-dependent cell-mediated cytotoxicity, 785
Insecticide, biological, involvement in ocular infection, 614
Instructions to authors, 185
Interferon
human leukocyte, in treatment of cytomegaloviral pneumonia, 557
recombinant leukocyte A
for the treatment of serious viral infections after marrow transplantation, 551
intranasally applied, efficacy and tolerance in normal volunteers, 535
pharmacokinetics during chronic renal failure and hemodialysis, 335
suppression of Dane particles in chronic hepatitis B virus infection, 907
type α
diminished capacity for production in homosexuals with acquired immune deficiency syndrome, 962
for prevention of rhinovirus infection and illness, 543
intranasal, human tolerance and histopathologic effects of long-term administration, 914
Intralipid, effects on the cytotoxicity of leukocytes for herpes simplex virus–infected cells, 181
Ixodes dammini and *B microti*, association with spirochetes in Rhode Island, 1124
Japan and Southeast Asia, analysis of H3N2 subtype influenza A viruses by monoclonal antibodies, 1126
Kawasaki syndrome, association with rotavirus infection, 177
Kenya
in vitro differences in sensitivity of *P falciparum* to amodiaquine and chloroquine in vitro, 732
seroepidemiology of hepatitis B in an urban population, 1122
Keratoconjunctivitis, epidemic, antigenic and restriction enzyme analyses of adenovirus types 19 and 37, 24
Ketoconazole compared to BAY n7133 as treatment of experimental murine aspergillosis, 898
Killing, intraluekocytic, of bacteria, perturbation of normal mechanisms, 189
Kinetics of early inflammatory events during experimental pneumonia due to *L pneumophila* in guinea pigs, 823
Kuwait, delta agent infection, 768
β-Lactam antibiotics
and coagulation abnormalities in cancer patients, 745
associated with bleeding (Readers' Register), 952
β-Lactamase, nonspecific induction in *E cloacae*, 765
β-Lactamase–associated antibiotic trapping as a potential means of resistance, a model system demonstration, 316
Lactase insufficiency, congenital intestinal in children, lack of protection from rotavirus infection, 1166
Legionella micdadei, contribution of human neutrophils and serum to host defense, 510
Legionella pneumophila pneumonia in guinea pigs, experimental, kinetics of early inflammatory events, 823
Leishmania infection in vitro, macrophage resistance, 1049
Leishmania tropica promastigotes, attachment of plasma membrane vesicles of human macrophages, 377
Leishmaniasis
cutaneous, miconazole as treatment, 1168
visceral, a comparison of three dosage regimens of sodium stibogluconate, 148
Leukemia, acute
prophylactic regimens in patients, 1171
serial enzyme-linked immunosorbent assay for antibody to *C albicans* during induction chemotherapy, 275
Leukocyte A interferon, recombinant
for the treatment of serious viral infections after marrow transplantation, 551
intranasally applied, efficacy and tolerance in normal volunteers, 535
suppression of Dane particles in chronic hepatitis B virus infection, 907
Leukocyte interferon
human, in treatment of cytomegaloviral pneumonia, 557
type α, intranasal, human tolerance and histopathologic effects of long-term administration, 914
Lipopolysaccharide
of *H influenzae*, electrophoretic heterogeneity and interstrain variation, 492
serotypes in *H influenzae* type b from patients with meningitis, 75, DEC
Liposome-encapsulated cephalothin, intraphagocytic killing of *S thyphimurium*, 563
Listeria monocytogenes peritonitis, continuous ambulatory peritoneal dialysis, 1130
Lysotype, comparison with plasmid pattern as an epidemiologic tool for *S typhimurium* epidemics, 7
Macrophage
cytotoxicity, human peritoneal, mediated by cytophilic IgG, 1040
resistance to in vitro infection with *Leishmania*, 1049
Macrophages
alveolar and peritoneal, effect of virulence of strains of *N asteroides* on acid-phosphatase activity, 117
human, attachment of plasma membrane vesicles to *L tropica* promastigotes, 377
Malaria, seroepidemiology in an area with a high incidence, longitudinal study of a population, 609
Male homosexuals, acquired immune deficiency syndrome, diminished capacity to make interferon-α and opportunistic infections, 962
Marrow transplantation, recombinant leukocyte A interferon for the treatment of serious viral infections, 551
Medical Perspective
molecular analysis of plasmids in epidemiologic investigation, 1
the geographic conundrum of infections, 751
Meningitis
bacterial, antibody to *M pneumoniae*, 363
due to *H influenzae* type b, homogeneity of subtypes, serotypes, and biotypes, 75, DEC
levels of creatine kinase isoenzyme BB in cerebrospinal fluid, 180
Meningococcal infections
recurrent, deficits of complement components, 331
trends in the United States, 754
Meningococcemia in genetically determined deficiency of the second component of complement, 941
Menstrual cycle, variation in receptivity to in vitro attachment of *E coli* to human uroepithelial cells, 412

Metronidazole, mechanism of action on *B fragilis*, 1083
Mexico, antimicrobial resistance of gram-negative bacteria in food, 766
Miconazole as treatment for cutaneous leishmaniasis, 1168
Microbial antagonisms, effect of erythromycin in gnotobiotic mice inoculated with human fecal flora, 579
Microbial flora, effect of broad-spectrum cephalosporins, 892
Microimmunofluorescence test for antibodies to *C trachomatis* in adults with respiratory disorders, 1167
Micropore filter assay, simplified, of neutrophil migration using whole blood, 881
Migration inhibitory factor, suppression of production in humans by tetracycline, 611
Migratory and chemotactic activity of neutrophils, impairment during murine cytomegalovirus infection, 518
Milk, human, excretion of cytomegalovirus, 615
Monoclonal antibodies, analysis of H3N2 subtype influenza A viruses in Japan and Southeast Asia, 1126
Mononuclear cell response specific to rhinovirus, 1125
Morphine, effect on resistance to infection, 656
Moxalactam for the treatment of bacterial meningitis in children, 886
Murine cytomegalovirus
  impaired migratory and chemotactic activity of neutrophils during infection, 518
  lethal infection after early viral replication in the spleen, 406
Murine cytomegalovirus–induced congenital defects and fetal maldevelopment, 836
Nasopharyngeal mucosa, human, attachment of *N meningitidis* and entry into columnar epithelial cells, 369
Neisseria gonorrhoeae
  DNA hybridization technique for detection in men with urethritis, 462
  induction of serum resistance in a low-molecular-weight fraction of guinea pig serum, 334
  penicillin-resistant, in vitro effectiveness of aztreonam, a new monobactam antibiotic, 612
Neisseria meningitidis
  group B, serotypes and polyacrylamide gel electrophoresis types in isolates in Spain, 249
  interaction with human nasopharyngeal mucosa, attachment and entry into columnar epithelial cells, 369
  meningitis in children, treatment with moxalactam, 892
Neonatal group B streptococcal early-onset disease
  epidemiologic rationale, 795
  interruption of mother-to-infant transmission, 810
  predictive value of prenatal cultures, 802
Neonatal sepsis, failure to demonstrate special virulence of nontypable *H influenzae* biotype 4, 615
Nephritis, cimetidine-induced interstitial, association with recurrent fever of unknown origin, 1132
Neutrophil granulocytopoiesis mediated by sera of patients, correlation with chronic schistosomiasis mansoni, 422
Neutrophil migration, simplified micropore filter assay using whole blood, 881
Neutrophils
  and human serum, contribution to host defense against *L micdadei*, 510
  effect of alveolar macrophages on bactericidal capacity, 101
  human, resistance of *N asteroides* to oxygen-dependent killing, 861
  murine, impaired migratory and chemotactic activity during murine cytomegalovirus infection, 518
Nocardia asteroides
  effect of virulence of strains on acid-phosphatase activity in alveolar and peritoneal macrophages, 117
  resistance to oxygen-dependent killing by neutrophils, 861
Nosocomial infection, staphylococcal, and methicillin-resistant *S aureus*, 763
Nucleotide sequence homology, absence between genes for *V cholerae* toxin and *V fluvalis*, 1166
Ocular infection caused by a biological insecticide, 614
Ohio, Rocky Mountain spotted fever in dogs, association with human patients, 1123
Ophthalmoencephalopathy, immune-mediated, blindness and behavioral abnormalities in rats due to Borna disease, 305
Opportunistic infections, diminished capacity to make interferon-α in homosexuals with acquired immune deficiency syndrome, 962
Opsonic and bactericidal activity of ascitic fluid from cirrhotic and noncirrhotic patients, 774
Opsonization of strains within the *B fragilis* group, quantitative variability in requirements, 667
Osteomyelitis due to *S aureus*, experimental, treatment with vancomycin and rifampin, 182
Outer membrane proteins of *H influenzae* type b subtypes and biotypes, 1127
Oxidative metabolism of neutrophils
  activation by respiratory syncytial virus antibody complexes, 110
  effect of *S aureus* enterotoxin F, 764
Parainfluenza viruses and respiratory syncytial virus, report of a workshop, 588
Pathogenesis
  of Borna disease in rats, immune-mediated viral ophthalmoencephalopathy, blindness, and behavioral abnormalities, 305
  of shigella diarrhea, evidence for a translocation step in the cytotoxic action of Shiga toxin, 844
Pathogenicity
  in *Y pestis*, genetic analysis of essential plasmid determinants, 297
  of *H influenzae*, comparative virulence of capsular transformants in normal and complement-depleted rats, 385
Penicillin
  and chloramphenicol in treatment of brain abscess, 737
  tolerance in streptococci, use of penicillin-gradient and replicate plates to demonstrate, 488
Penicillin-resistant gonococci, in vitro effectiveness of aztreonam, a new monobactam antibiotic, 612
Peritonitis due to *L monocytogenes*, continuous ambulatory peritoneal dialysis, 1130
Pertussis vaccine, new, 146
Pertussis, transplacental and transcolostral immunity, in a mouse model using acellular pertussis vaccine, 138
Phage types of *V cholerae* O1 biotype El Tor from patients in Bangladesh, epidemiologic implications, 998
Pharmacokinetics
  of human and recombinant leukocyte interferon during chronic renal failure and hemodialysis, 335
  of vidarabine treatment of infants and children with herpesvirus infection, 721

Pili of *E coli* K1, role in the pathogenesis of neonatal infection, 395
Plasmid determinants of pathogenicity in *Y pestis*, genetic analysis, 297
Plasmid patterns
epidemiologic tool for *S typhimurium* epidemics, comparison with lysotype, 7
retrospective analysis in a study of burn unit outbreaks of *E cloacae* infection, 18
Plasmid profile analysis, evaluation of isolated cases of salmonellosis, 12
Plasmids
molecular analysis in epidemiologic investigation, 1
poorly mobilizable, efficacy in biologic containment and risk assessment of recombinant DNA in humans, 699
Plasmodium falciparum, in vitro differences in sensitivity to amodiaquine and chloroquine in vitro in Kenya, 732
Pneumococcal challenge, intravascular, effect on vascular permeability in rabbits, 179
Pneumococcal vaccination in children younger than five years of age, antibody response, 131
Pneumonia
cytomegaloviral
treatment with high-dose acyclovir and human leukocyte interferon, 557
risk factors in development in renal transplant recipients, 1121
experimental, due to *L pneumophila* in guinea pigs, kinetics of early inflammatory events, 823
Polyacrylamide gel electrophoresis
characterization of cell proteins of *H ducreyi*, 710
types and serotypes in isolates of group B *N meningitidis* in Spain, 249
Polysaccharide, type-specific, of group B *Streptococcus* type Ia, protective level of human IgG antibody, 648
Polysaccharide vaccine
capsular
against *H influenzae* type b, class-specific antibody response, 767
second generation pneumococcal vaccine, 1136
from *P aeruginosa*, human immune response, 206
Preeclampsia and bacteriuria due to *U urealyticum* and *G vaginalis*, 605
Pregnancy
and cytomegalovirus-specific cell-mediated immunity in lower socioeconomic class adolescents, 621
and *U urealyticum*, cervical and placental colonization and fetal outcome, 333
defect in human neutrophil superoxide anion generation by *N*-formylmethionylleucylphenylalanine, 194
variation of receptivity to in vitro attachment of *E coli* to human uroepithelial cells, 412
Prekallikrien, purified human plasma, activation by cell wall fractions of *E coli* and *S aureus*, 682
Presidents' Pages, viral respiratory disease at Lowry Air Force Base in Denver, 1952–1982, 775
Prophylactic significance of the nonlipopolysaccharide antigens of *V cholerae*, 931
Prophylaxis, antibiotic regimens in patients with acute leukemia, DEC
Proteins, cell, of *H ducreyi*, characterization by polyacrylamide gel electrophoresis, 710
Pseudomonas aeruginosa
bacteremia, use of a combined typing system in an eight-year study, 603
infections, experimental, and antibiotic synergism, 1172
polysaccharide vaccine, human response, 206
Pulmonary mycetoma, acute, due to *C albicans*, complete resolution, 1131
Purified protein derivative, tuberculin, immunochemical analysis with special reference to United States–Japan antigen 7, 500
Pyelonephritis, experimental,
genetic factors and host resistance, 336
immunomodulatory interactions of suppressor cells, cell-mediated immunity, and cyclophosphamide, 1096
Q fever
and hemolytic anemia, 769
associated with endocarditis in Nova Scotia, 978
phase I vaccine, clinical and immunologic evaluation by skin test in humans, 214
Rabbits, increased vascular permeability caused by purified thermostable direct hemolysin from *V parahaemolyticus*, 1129
Rabies antibody, persistence in free-ranging raccoons, 610
Raccoons, free-ranging, persistence of rabies antibody, 610
Radioimmunoassay
avidin-biotin, for human rotavirus, 942
for specific IgM antibodies to cytomegalovirus, specificity and sensitivity, 616
Raw milk cheese, 1169
Readers' Register
acquired immune deficiency syndrome and variants, 358
bleeding associated with β-lactam antibiotics, 952
results of therapy for enterococcal endocarditis, 162
Recombinant interferon type α2 for prevention of rhinovirus infection and illness, 543
Recombinant leukocyte A interferon
for the treatment of serious viral infections after marrow transplantation 551
interferon, suppression of Dane particles in chronic hepatitis B virus infection, 907
intranasally applied, efficacy and tolerance in normal volunteers, 535
Reinfection with varicella-zoster, immunologic evidence, 200
Renal failure, pharmacokinetics of human and recombinant leukocyte interferon during hemodialysis, 335
Renal infection in rats, acute vs chronic, effect of cyclophosphamide, 337
Renal syndrome and hemorrhagic fever, Hantaan virus as prototype virus, 1005
Renal transplantation
correlation of invasive aspergillosis and corticosteroid therapy, 230
risk factors in development of cytomegalovirus-related pneumonia, 1121
Resistance
and genetic factors in experimental pyelonephritis, 336
and β-lactamase–associated antibiotic trapping, a model system, 316
antimicrobial, of gram-negative bacteria isolated from foods in Mexico, 766

enzyme-mediated aminoglycoside, in gram-negative bacilli, comparison of Turkey and the United States, 1128
induction in serum by a low-molecular-weight fraction of guinea pig serum in isolates of *N gonorrhoeae*, 334
of *N asteroides* to oxygen-dependent killing by neutrophils, 855
macrophage, to in vitro infection with *Leishmania*, 1055
to infection, effect of morphine, 656
Respiratory disease, viral, at Lowry Air Force Base in Denver, 1952–1982, 775
Respiratory epithelial cells, human, adherence of *B pertussis*, 125
Respiratory syncytial virus
and parainfluenza viruses, report of a workshop, 588
antibody complexes, activation of oxidative and arachidonic-acid metabolism in neutrophils, 110
Reye's syndrome, disease mechanisms and prospects for prevention summary of a workshop, 943
Rhinovirus
infection and illness, interferon $\alpha 2$ for prevention, 543
specific mononuclear cell response, 1125
Rhode Island, spirochetes in *I dammini* and *B microti*, 1124
Rickettsia rickettsii as antigen in an IgM and IgG enzyme-linked immunosorbent assay for Rocky Mountain spotted fever, 876
Rifampin treatment of experimental chronic osteomyelitis due to *S aureus*, 182
RNA
from human rotavirus, use of electrophoresis to establish the identity of strains in a tertiary care nursery, 34
genome, and human rotavirus, 49
Rocky Mountain spotted fever
chick embryo cell–derived vaccine, reactogenicity, immunogenicity, and efficacy, 922
IgM and IgG enzyme-linked immunosorbent assays and indirect fluorescent antibody test, 876
in dogs, association with human patients in Ohio, 1123
Rotavirus
human
and genome RNA, 49
association with Kawasaki syndrome, 177
avidin-biotin radioimmunoassay, 942
epidemiology in a cohort of 45 Guatamalan Mayan Indian children observed from birth to the age of three years, 452
isolated in Chile, characteristics and analysis of electropherotypes, 41
lack of protection from infection in children with congenital intestinal lactase insufficiency, 1166
use of electrophoresis of RNA to establish the identity of strains in a tertiary care nursery, 34
infection in mice, effect of clioquinol, an 8-hydroxyquinoline derivative, 613
vaccine candidate, bovine, protection in colostrum-deprived piglets using human rotavirus strains for challenge, 1061
Rubella virus challenge in volunteers with low levels of antibody, effect on viremia, virus excretion, and antibody response, 639
Salmonella typhimurium
intraphagocytic killing by liposome-encapsulated cephalothin, 563
plasmid pattern compared to lysotype as an epidemiologic tool, 7
Salmonellosis, evaluation of isolated cases by plasmid profile analysis, 12
Salpingitis due to *C trachomatis* in mice, 1101
Saudi Arabia, prevalence of antibody to hepatitis A virus in a hospital population, 1167
Schistosomiasis mansoni, chronic, splenic myelopoiesis and inhibition of neutrophil granulocytopoiesis mediated by sera, 422
Seroepidemiology
of hepatitis B in an urban population in Kenya, 1122
of malaria in an area with a high incidence, longitudinal study of a population, 609
Serology of *S aureus* infections using multiple antigens and serial serum samples, 608
Serotypes and polyacrylamide gel electrophoresis types in isolates of group B *N meningitidis* in Spain, 249
Serratia marcescens, in etiology of bloodstream infections in hospitalized patients, 57
Serum, human
and neutrophils, contribution to host defense against *L micdadei*, 510
immunoglobulin levels in certain viral infections of the central nervous system, 607
Shiga toxin, evidence for a translocation step in cytotoxic action during shigella diarrhea, 844
Shigella diarrhea, evidence for a translocation step in the cytotoxic action of Shiga toxin, 844
Sodium stibogluconate, a comparison of three dosage regimens in therapy for visceral leishmaniasis, 148
Southeast Asia and Japan, analysis of H3N2 subtype influenza A viruses by monoclonal antibodies, 1126
Spain, serotypes and polyacrylamide gel electrophoresis types in isolates of group B *N meningitidis*, 249
Spirochetes in *I dammini* and *B microti* in Rhode Island, 1124
Spleen, mouse, lethal infection with murine cytomegalovirus after early viral replication, 406
Splenic myelopoiesis, correlation with chronic schistosomiasis mansoni, 422
Staphylococcus aureus
and *E coli* cell wall fractions, activation of human purified plasma prekallikrein, 682
enterotoxin F and human neutrophil oxidative metabolism, 763
infections, serology using multiple antigens and serial serum samples, 608
in vitro activity of cefonicid, ceforanide, and cefazolin and effect of human serum, 178
methicillin-resistant, and incidence of nosocomial staphylococcal infection, 763
chronic osteomyelitis, experimental, treatment with vancomycin and rifampin, 182
Staphylococcus epidermidis, in vitro activity of cefonicid, ceforanide, and cefazolin and effect of human serum, 178
Statement of editorial policy, 183
Streptococcal group B early-onset disease, neonatal, selective chemoprophylaxis
interruption of mother-to-infant transmission, 810
predictive value of prenatal cultures, 802
epidemiologic rationale, 795

Streptococcal infection, group B, summary of a workshop, 163
Streptococci, use of penicillin-gradient and replicate plates to demonstrate penicillin tolerance, 488
Streptococci, group B
  β-hemolytic, rectal colonization in a geriatric population, 1120
  gastrointestinal carriage, 361
  type-specific type Ia polysaccharide and protective level of human IgG antibody, 648
Streptococcus bovis associated with human endocarditis, humoral reactions, 266
Streptococcus pneumoniae, immunologic responses of children to serious infections, 427
Suppressor cells, cell-mediated immunity, and cyclophosphamide, immunomodulatory interactions in experimental nephritis, 1096
Tecumseh study, enteric agents in the community, 284
Tetracycline, suppression of production of migration inhibitory factor in humans, 611
Therapy, corticosteroid, for invasive aspergillosis in renal transplantation, 230
Toxic-shock syndrome and prevalence of antibody to staphylococcal enterotoxin F in Wisconsin, 692
Toxin
  A of *C difficile* in infants, 606
  A and B of *C difficile*, serum antibody response, 93
  Shiga, evidence for a translocation step in cytotoxic action during shigella diarrhea, 844
Tribute, Lewis A. Wannamaker, 366
Tuberculin purified protein derivative, with special reference to United States–Japan antigen 7, immunochemical analysis, 500
Tuberculosis
  pulmonary, control of susceptibility by human leukocyte antigen and association with HLA-DR types, 676
  sensitivity and specificity of an enzyme-linked immunosorbent assay, 1170
Tularemia, clinically mild, associated with thick-bone *F tularensis*, 63
Turkey and the United States, comparison of enzyme-mediated resistance in gram-negative bacilli, 1128
Typhoid in the United States and the risk to the international traveler, 599
Typing system, combined, for bacteremia due to *P aeruginosa*, an eight-year study, 603
United States
  acquired immune deficiency syndrome, 339
  trends of meningococcal disease, 754
  typhoid and the risk to the international traveller, 599
  water-related disease outbreaks, 759
  and Turkey, comparison of enzyme-mediated resistance in gram-negative bacilli, 1128
United States–Japan, antigen 7 in tuberculin purified protein derivative, immunochemical analysis, 500
Ureaplasma urealyticum
  bacteriuria in women with preeclampsia, 605
  cervical and placental colonization in pregnant women, fetal outcome, 333
Urethritis, DNA hybridization technique for the detection of *N gonorrhoeae*, 462
Urinary tract
  etiology of bloodstream infections in hospitalized patients, 57
  infections in women, recurrent, frequency of human leukocyte antigens, 604
Uroepithelial cells, human, variations in receptivity to in vitro attachment of *E coli*, 412
Vaccination for hepatitis B in hemodialysis centers, cost benefit, 770
Vaccine
  against pertussis, new, 146
  candidate, bovine rotavirus, protection in colostrum-deprived piglets using human rotavirus strains for challenge, 1061
  capsular polysaccharide, against *H influenzae* type b, class-specific antibody response, 767
  Dengue 2, dose response in volunteers in relation to Yellow Fever immune status, 1055
  H influenzae type b
    immunogenicity in combination with diphtheria-pertussis-tetanus vaccine in infants, 530
    summary of a workshop, 167
  hepatitis B virus, IgM antibody responses to hepatitis B surface antigen, 330
  immunogenicity in healthy Chinese neonates, 526
